

## Energy Management Policy

Based on CTCI Group's professional engineering expertise and management capability, the organization is committed to achieving efficient, sustainable, and safe use of energy. It actively fulfills its corporate social responsibility and complies with the requirements of ISO 50001:2018. The energy policy serves as the guiding principle for the Energy Management System, which is reviewed and updated annually to ensure its continuing suitability, adequacy, and improvement for the headquarters building of CTCI Group.

Our Commitments:

### **Continual Improvement of the Energy Management System and Energy Performance**

We are committed to the continual improvement of our Energy Management System (EnMS) and energy performance. We strive to enhance energy efficiency, reduce energy consumption and greenhouse gas emissions, and establish energy objectives and targets supported by measurable performance indicators. We also ensure that appropriate information and resources are provided to achieve our energy goals effectively.

### **Compliance with Legal and Other Requirements**

We comply with all applicable energy-related legal requirements, regulations, and other compliance obligations. We also actively support national energy policies and align our practices with recognized energy management standards and guidelines.

### **Employee Participation and Competence Development**

We enhance employee awareness and competence through energy management education and training. We encourage all personnel to actively participate in improving energy efficiency and implementing energy-saving initiatives across their areas of responsibility.

### **Provision of Resources and Technological Innovation**

We provide the necessary resources to ensure the effective operation of the Energy Management System (EnMS). We also adopt advanced technologies and equipment to enhance energy performance, while promoting green engineering and driving innovation in energy efficiency.

### **Communication and Transparency**

Regular communication of the energy policy and performance is maintained with internal personnel and external interested parties, fostering a culture of energy conservation and continual promotion of sustainable energy management principles throughout the organization.
